ACKNOWLEDGEMENT

We are utmost grateful to our subject teacher, **Mr. Anul Joshi** for providing us with the opportunity for this case study. We would also like to thank the Head of Department of Computer Engineering, **Er. Prem Chandra Roy**.

We would like to express our sincere gratitude to **Mr. Amar Shahi**, the head of Operations Department at Toggle Corp and the entire team for providing us with their valuable time and information regarding the organization and its structure.

We would also like to thank our seniors and friends for providing guidance and necessary details. Finally, we thank our group members for their cooperation.

ABSTRACT

The subject Organization and Management gives us essential knowledge about organization, their structure, management, policies, financial and economic status. This case study includes the introduction, goals and objectives, technical aspects, organization structure of the IT company named Toggle Corp. We observed the organization's various activities, mainly its technical aspects and the managerial activities. Furthermore, we also understood the flow of how a project is handled in this company.

The objective of this case study is to relate the managerial theories we studied in the textbooks with that of the practical aspect. It helps to gain ideas on the structure of the organization, the different levels of management, the technical workout in the organization, the acts and policies related to managerial issues of the management along with making us aware of our field related terms and terminologies.

INTRODUCTION

Toggle Corp, founded in 2016, is a vibrant software development and data analysis company. Based in Nepal, it employs around 35 skilled professionals dedicated to delivering web-based software, mobile applications, and comprehensive data analysis services. The company caters to a diverse clientele, including humanitarian organizations, NGOs, as well as for-profit companies, with a notable presence in Europe. Toggle Corp's mission is to inspire talented individuals to pursue meaningful careers in Nepal and empower them to innovate in an engaging and supportive workplace. Their commitment to social impact is reflected in collaborations with prominent organizations like the UNHCR and the American Red Cross. The company's work spans various sectors, providing solutions that drive change and continuous improvement. Through projects like DEEP and NPStocks, Toggle Corp has demonstrated its expertise in transforming complex data into actionable insights, showcasing its ability to address real-world challenges with innovative solutions.

Objectives of the Organization

- To provide software development services on par with international companies.
- To help the client understand details hidden in their data with data analytics.
- To empower Nepali individuals to grow and innovate in Nepal.

Motto of the Organization

Toggling ideas into reality: An ambitious team revolutionizing existing processes through software development and data analysis.

Product Portfolio

Toggle Corp has established itself as a trusted partner for over 20 clients, delivering tailored software solutions and data analytics services.

Some of their major clients include:

1. **British Embassy Kathmandu:** Providing solutions to support diplomatic initiatives.
2. **UNHCR:** Assisting with data-driven insights for refugee and humanitarian efforts.

3. **American Red Cross:** Enhancing disaster response capabilities through technology.
4. **S.M.T.M Capital:** Offering financial analytics and software development.
5. **Okular Analytics:** Delivering advanced data analysis tools and platforms.
6. **World Vision:** Supporting global humanitarian programs with innovative technology.
7. **Bold Code:** Collaborating on software projects with a focus on innovation.
8. **Data Friendly Space:** Providing data management and analysis solutions.
9. **Joint IDP Profiling Service:** Assisting in data collection and profiling for displaced populations.
10. **People in Need – Czech Republic:** Partnering on humanitarian projects and technology solutions.
11. **Internal Displacement Monitoring Center:** Delivering tools and analytics for monitoring displacement.

Provided Services

Toggle Corp mainly specializes in Web Development and Data Analytics. Some of the services provided by the organization are -

1. Web & Mobile Application Development

Toggle Corp specializes in creating custom web and mobile applications that cater to the unique needs of its clients. They focus on delivering user-friendly, responsive, and scalable solutions, utilizing modern technologies to ensure optimal performance and security. Their development process includes understanding client requirements, designing intuitive interfaces, and implementing robust back-end systems.

2. Data Tagging, Research, and Analysis

Toggle Corp offers data tagging, research, and analysis services to help organizations make informed decisions. They gather and organize data from various sources, providing insights through detailed analysis and visualization. This service is particularly beneficial for clients

in the humanitarian sector, where understanding data trends can lead to more effective interventions and strategies.

3. Consultation

In addition to development and analysis, Toggle Corp provides consultation services to guide clients through digital transformation processes. Their experts work closely with clients to identify challenges, recommend best practices, and design tailored solutions that align with business objectives. This service helps organizations leverage technology to enhance efficiency and drive growth.

These services underscore Toggle Corp's commitment to delivering high-quality, impactful solutions that address the specific needs of their diverse clientele.

ORGANIZATION STRUCTURE

Toggle Corp adopts a flat organizational structure that promotes flexibility, creativity, and collaboration. This approach contrasts with traditional hierarchical structures by encouraging open communication and reducing the barriers between management and employees. It allows for a more dynamic environment where ideas can be freely exchanged, fostering innovation and rapid problem-solving.

A. Co-founders

Leadership and Vision: The company was established by four co-founders, who were instrumental in shaping its vision, culture, and strategic direction. As of now, two of these co-founders remain actively involved in the daily operations and strategic planning at the office. Their presence ensures that the founding vision and ethos continue to guide the company's growth and development. The other two co-founders, while no longer directly involved, contributed to the foundational principles and initial growth strategies.

B. Senior Managers

Role and Responsibilities: Positioned directly under the co-founders, senior managers are crucial in translating the company's vision into actionable plans. They oversee different departments and projects, ensuring alignment with the company's goals. Senior managers are responsible for strategic planning, resource allocation, and maintaining high standards of quality and efficiency in project delivery. They help maintain communication and coordination across the departments.

C. Departments

Toggle Corp is organized into three main departments, each with distinct functions but working collaboratively towards common objectives. The three main departments are:

i. Software Development

Focus and Activities: This department is dedicated to the design and creation of web-based software and mobile applications. The team employs cutting-edge technologies and agile methodologies to develop customized solutions that meet clients' specific needs. Their work involves close collaboration with clients to understand

requirements, design user-centric interfaces, and build scalable and secure applications.

ii. Data Analysis

Functions and Services: The data analysis department is responsible for transforming raw data into meaningful insights. Their tasks include data collection, cleaning, analysis, and visualization. They generate reports that help clients make data-driven decisions and assess the impact of their initiatives. This department often works with clients from the humanitarian sector, providing analytical support that can inform strategy and enhance operational efficiency.

iii. Operations

Management and Oversight: The operations department ensures the seamless functioning of the organization. This includes managing financial operations, human resources, and updating client contracts. The operations team is vital in maintaining organizational efficiency, ensuring compliance with regulations, and supporting other departments in achieving their objectives. They focus on process optimization and implementing best practices to enhance overall performance.

D. Collaborative Environment

Toggle Corp's flat structure encourages a culture of empowerment and autonomy among employees. By minimizing hierarchical barriers, team members are encouraged to take initiative, share ideas, and contribute to the company's innovation and success. This structure supports a collaborative environment where employees feel valued and motivated to pursue excellence in their work. The company's approach to management and organization reflects its commitment to fostering a workplace that encourages personal and professional growth, allowing for both individual and collective achievements.

DEVELOPMENT CYCLE OF A PRODUCT

The workings from the initiation to product deployment can be explained as follows:

Initial Client Interaction Process

- Client reaches out via email with requirements.
- Internal evaluation of skills, resources, and human resources.
- Initial quick virtual meeting with the client.
- Detailed gathering of client's needs and feasibility assessment.
- Proposal sent to the client including pricing, development time, and technologies to be used.
- Adjustments made based on client feedback.
- Contract signed and development work begins.

Development Work Process

Toggle Corp follows a structured and iterative approach to their development process, ensuring high-quality products that meet client needs. The process is divided into several key stages:

1. Requirement Gathering

Detailed Collaboration with the Client: This initial stage involves thorough discussions with the client to understand their needs, objectives, and specific requirements. The goal is to capture all necessary information to ensure the final product aligns with the client's vision.

2. Documentation

Documenting Requirements: Once the requirements are gathered, they are meticulously documented. This documentation serves as a reference throughout the development process, ensuring that all team members are aligned with the project goals and specifications.

3. Visualization

Prototype Development: Based on the documented requirements, prototypes or mock-ups are

created. These visual representations help clients and developers to visualize the end product and make necessary adjustments early in the process.

4. Adjustments/Changes

Multiple Iterations: The prototypes undergo several iterations based on client feedback. Adjustments and changes are made until the client approves the final design. This iterative approach helps in refining the product and ensures that it meets client expectations.

5. Development

Actual Product Development: With the design finalized, the development team begins the actual coding and creation of the product. This stage involves turning the approved prototypes into a functional software application, following best practices and coding standards.

6. Analysis

QA Team Analysis and Final Report Preparation: The Quality Assurance (QA) team conducts thorough testing of the developed product. They analyze the product for any bugs, performance issues, and ensure it meets the specified requirements. A final report is prepared, detailing the testing outcomes and any identified issues.

7. Deployment

Product Deployment: Once the product passes all QA checks, it is deployed to the production environment. This stage involves making the product live for end-users and ensuring that it integrates smoothly with existing systems.

8. Maintenance and Support

Post-Deployment Support: After deployment, Toggle Corp provides ongoing maintenance and support. This includes addressing any issues that arise, implementing updates, and ensuring the product continues to operate efficiently. Continuous support ensures that clients can rely on the product long-term and that it remains aligned with their evolving needs.

PERSONNEL POLICIES

Toggle Corp prioritizes a balanced work environment, promoting equality and respect among employees. The company maintains a male-to-female ratio close to 1:1, with a slight majority of female employees. The personnel policies include:

1. Work Schedule

There is flexibility in the work schedule, as the company firmly believes that compromising personal safety and health for punctuality is highly unnecessary.

2. Financial Management

The two active co-founders are responsible for the financial management of the company. The finances are discussed by the co-founders, and they are responsible for making the financial decisions.

3. Leave Policy

Toggle Corp is quite flexible in terms of leaves, unlike most companies. Toggle Corp has only 2 days' notice period for leaves. The company also follows the government's recommended guidelines for number of days on leave.

4. Salary Structure

Employees receive a monthly salary. Consultants and part-timers are paid on a project basis.

5. Motivating Factors

High emphasis on organizational culture, flexibility, recreational activities, performance-based bonuses, and regular social events.

Manpower Planning and Hiring

Toggle Corp's manpower planning focuses on internal growth and development. The company uses a hybrid approach for hiring, with a high priority given to internal referrals. If the vacant role cannot be fulfilled internally, the HR then reaches out to suitable candidates through LinkedIn. After this, if necessary, the company reaches out to recruiting agencies, or job portals like Mero Job.

Also, the flat organizational structure allows for flexibility in roles and responsibilities, with employees taking on leadership roles as needed. This approach ensures that the right skills are available for each project and that employees have opportunities for growth and advancement.

Onboarding and Internships

- Onboarding: New hires undergo an internal onboarding process and have a three-month probation period.
- Internships: Senior developers train interns, with hiring based on organizational needs.

Employee Retention

Toggle Corp attributes its high employee retention rate (average of 4-5 years) to its strong organizational culture and a decent market salary. The company believes that a supportive and engaging work environment plays a crucial role in retaining employees.

MARKETING

The organization has been hardly involved in marketing on their own as they firmly believe that word of mouth is far better when it comes to advertising. The company mainly focuses on making high quality products for the clients so that the clients are satisfied with the company and refer the company to other clients.

OWNERSHIP

The company was established on 2016 by four college graduates from IOE, Pulchowk Campus. Out of the four co-founders, two have left the company while the remaining two are actively involved in it. One of the two active co-founders, **Er. Ankit Mehta**, is the CEO of the company while the other active co-founder, **Er. Aditya Khatri**, is a senior developer in the company.

CORPORATE SOCIAL RESPONSIBILITY (CSR)

Toggle Corp is actively involved in CSR activities, including:

- Sponsoring free bus rides during Dashain.
- Teaching at development schools.
- Conducting tree plantations.
- Distributing supplementary books in remote locations.

Strong Points of the Organization

1. Focus on retaining skilled workers in Nepal by providing a good environment to work in.
2. High employee retention rate of the company suggests that the employees are satisfied with the company.
3. Most of their current clients were recommended by their other clients, which hints at the quality of work done by the company.
4. A flat organization structure ensures that all the members of the company are comfortable with each other.
5. High focus on doing social outreach activities.

Weak Points of the Organization

1. A flat structure may lead to a lack of available promotions.
2. As the company is mainly focused on word of mouth for acquiring new clients, they maybe unable to land clients in other scenarios.
3. As the company grows, it may be difficult to maintain the organizational structure.
4. With the focus on conducting different recreational activities so very often, the indirect costs quickly add up.

SOME GLIMPSE FROM OUR VISIT TO THE TOGGLE CORP OFFICE
